Pathways to Master of Clinical Audiology

School of Human Sciences

Are you an Aboriginal or Torres Strait Islander health worker interested in health, hearing, and helping your community?

The University of Western Australia invites you to join our Audiology Bridging Course, designed to support students on their journey into the Master of Clinical Audiology program.

Why Audiology?

- Audiologists make a real difference by diagnosing and treating hearing loss and ear disease.
- A career in audiology is rewarding, with opportunities to work across health, education, and community services.

About the Bridging Course

- Culturally supportive learning environment at UWA.
Covers key skills in science, communication, and clinical practice to prepare you for postgraduate study.
- Learn from experienced lecturers, support staff and practicing audiologists.
- Build connections with peers and mentors who will walk with you on your study journey.

Who Can Apply?

- Aboriginal and Torres Strait Islander health worker currently working in Allied Health and/or a community health setting.

Benefits

- Scholarships available
- Strengthen academic skills
Gain confidence for university study
- Access UWA's Indigenous Student Support Services

<https://www.uwa.edu.au/study/courses/master-of-clinical-audiology>

Where will I study?

Crawley Campus - University of Western Australia, Perth

How do I apply?

Contact the UWA Audiology department for details on the application process at uwaaudiology-shs@uwa.edu.au

Career opportunities

As an Audiologist you'll have the opportunity to work in a variety of workplaces including diagnostic hospital settings, hearing device and rehabilitation clinics, clinical support positions with hearing device manufacturers, rural and remote outreach programs and research institutes. UWA Audiology graduates are highly skilled and sought after locally, nationally and internationally with all past graduates securing positions within three months of course completion.

Make a difference in Aboriginal ear health!

About the School of Human Sciences

The School of Human Sciences is a large multi-disciplinary School with research and teaching focused on better understanding what it is to be human, from our structure, function, development and genetics, to adaption, performance and evolution.

Our students are provided with a fundamental interdisciplinary understanding of humans and the manner in which we adapts to challenging and disruptive change. Our graduates become innovative and integrative scientific thinkers, whose careers can be found in fields relating to understanding development, disease and the limits of human tolerance and performance.

Information is current as at September 2025 and is subject to change.
